Walk to the former quarry of Holcim

From 1975 until 1995 Holcim produced cement in Reckingen and during that time the necessary chalk was obtained from a nearby quarry. In 1995 the factory

was closed and Holcim had to re-naturalise this quarry. Since then nature has regained its place and it is interesting to see the various stages of growth.

We meet at the synagogue Lengnau and drive from there to the starting point of the walk. The walk will take about two hours.
