

**Tuesday 11<sup>th</sup> October, 2016, 20.00h**  
Cheminéeraum, Gasthaus Hirschen, Kirchdorf

## **Guest Speaker: Hans-Ulrich Thomas**

An active beekeeper, he will introduce us to the most important function of the honeybee: pollination of flowers.

But not only bees are important; other animals are active in this „service“ as well. Several short video sequences will give an introduction to the manifold ways flowers are pollinated.

The video clips are absolutely outstanding and this time the talk will be in English!!

Do join us for a meal with Hans-Ulrich Thomas in the Restaurant Hirschen at 18.30h.

Any questions please contact Sheila Sandmeier
