With the increasing expansion of photovoltaic and wind plants, integrating the thereby irregularly generated power into the existing energy system is becoming a challenge.

A new visitor's station at the Paul Scherrer Institute offers a playful approach to making this complex subject matter easy to understand. It tells the story of a Swiss town that makes the change from a conventional energy supply to one with new renewable energy sources.

The tour lasts between 2.5 – 3 hours. There is a refreshment break in-between.

I have to provide a list of participants a month in advance. If you wish to come along, please let me know by

3rd June 2017

Tel. 056 281 26 38 or gaby.meierpauk@gmail.com
