

Sunday, 10th June 2018
13.30 h

Bergwerk Herznach

Bergwerkstr. 36, Herznach

The first mention of mining iron ore in this place dates back to 1207. However from 1937 during the war it reached a new peak. The mine was closed in 1969. In an 80 m long reopened shaft and in the adjoining museum, we can see numerous impressive fossils. .

We have booked a guided tour (in German language) for this very special “industry” of Switzerland.

We meet at the “Silo” next to the museum at 13.30h .
