

Wednesday, 16th November 15.45 h

**What happens to all your green waste?
Come along and see!**

Komogas Bioriko produces CO₂-neutral energy out of biodegradable materials. The by-product of this procedure is a certified natural fertiliser. Both products are an essential contribution to the ecological and socio- economic environment - for us and also the coming generations

**We meet at 15.45 at:
Komogas Bioriko, Zelgli 10a, 5313 Klingnau**

Wear old, washable clothes as it smells in the complex. Stout shoes are necessary, preferably gumboots, if it is raining.

For further information ring Sheila Sandmeier 056 222 65 29
